

Hilarious AI Workflow Experiments

Turn your boring automation into a comedy goldmine with these playful AI prompt ideas

Give Your AI Wild Personalities

Transform Your Boring Agent

Instead of plain prompts, inject character into your AI Agent nodes. Your Google Gemini can become anyone from a grumpy fortune teller to a confused alien!

The key is in the persona setup - one simple character description completely changes the output tone and humor level.

Personality Prompt Examples

Grumpy Fortune Teller

"Act as a grumpy fortune teller. Write a funny, two-line prophecy about [name], a [profession] with [looks]."

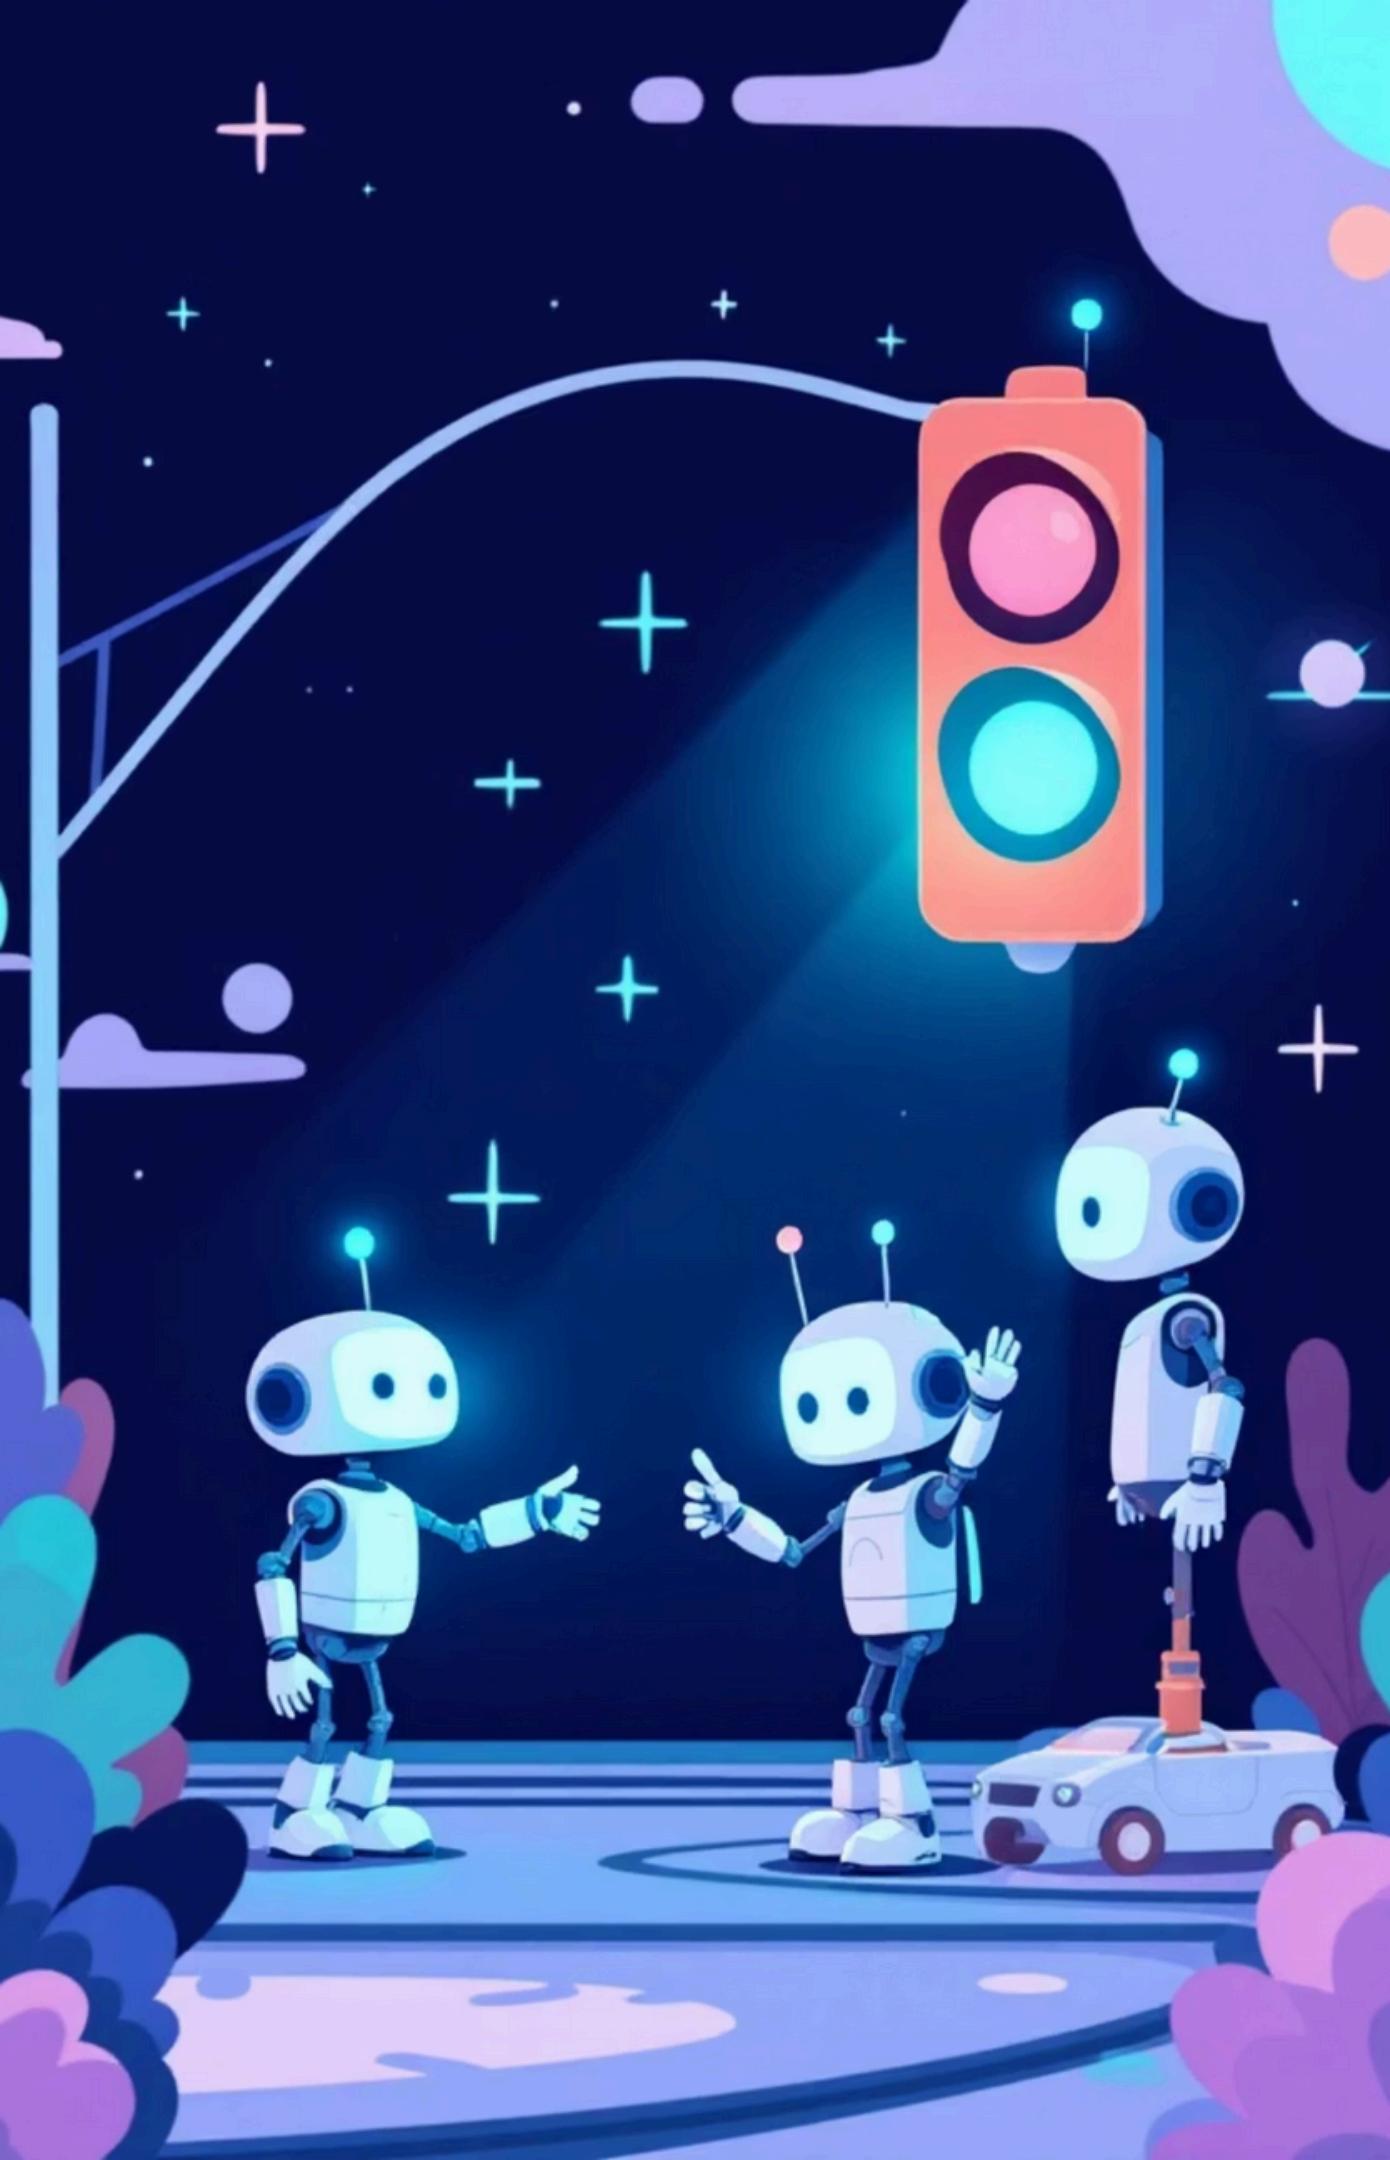

Confused Alien

"Act as a confused alien trying to understand human jobs. Write a funny observation about [name], a [profession]."

Dramatic Shakespeare

"Act as a terribly dramatic Shakespearean actor. Write a tragic, two-line summary of [name], a [profession]."

Switch Nodes = Comedy Gold

Use Switch nodes as your comedy traffic controller! Route different professions to hilariously specific "treatments" and watch the chaos unfold.

Software developers get "bug therapy," AI managers get "human complaint departments" - the possibilities are endless!

Generate Silly Superpowers

Useless but Hilarious

Create completely pointless superpowers based on someone's profession. The more absurd, the better!

"The plumber named John can see through walls, but only if they're made of socks."

Perfect for breaking the ice or just getting a good laugh out of your workflow experiments.

Achievement Unlocked System

Life Game Mechanics

Turn everyday professions into video game achievements that are both relatable and ridiculous.

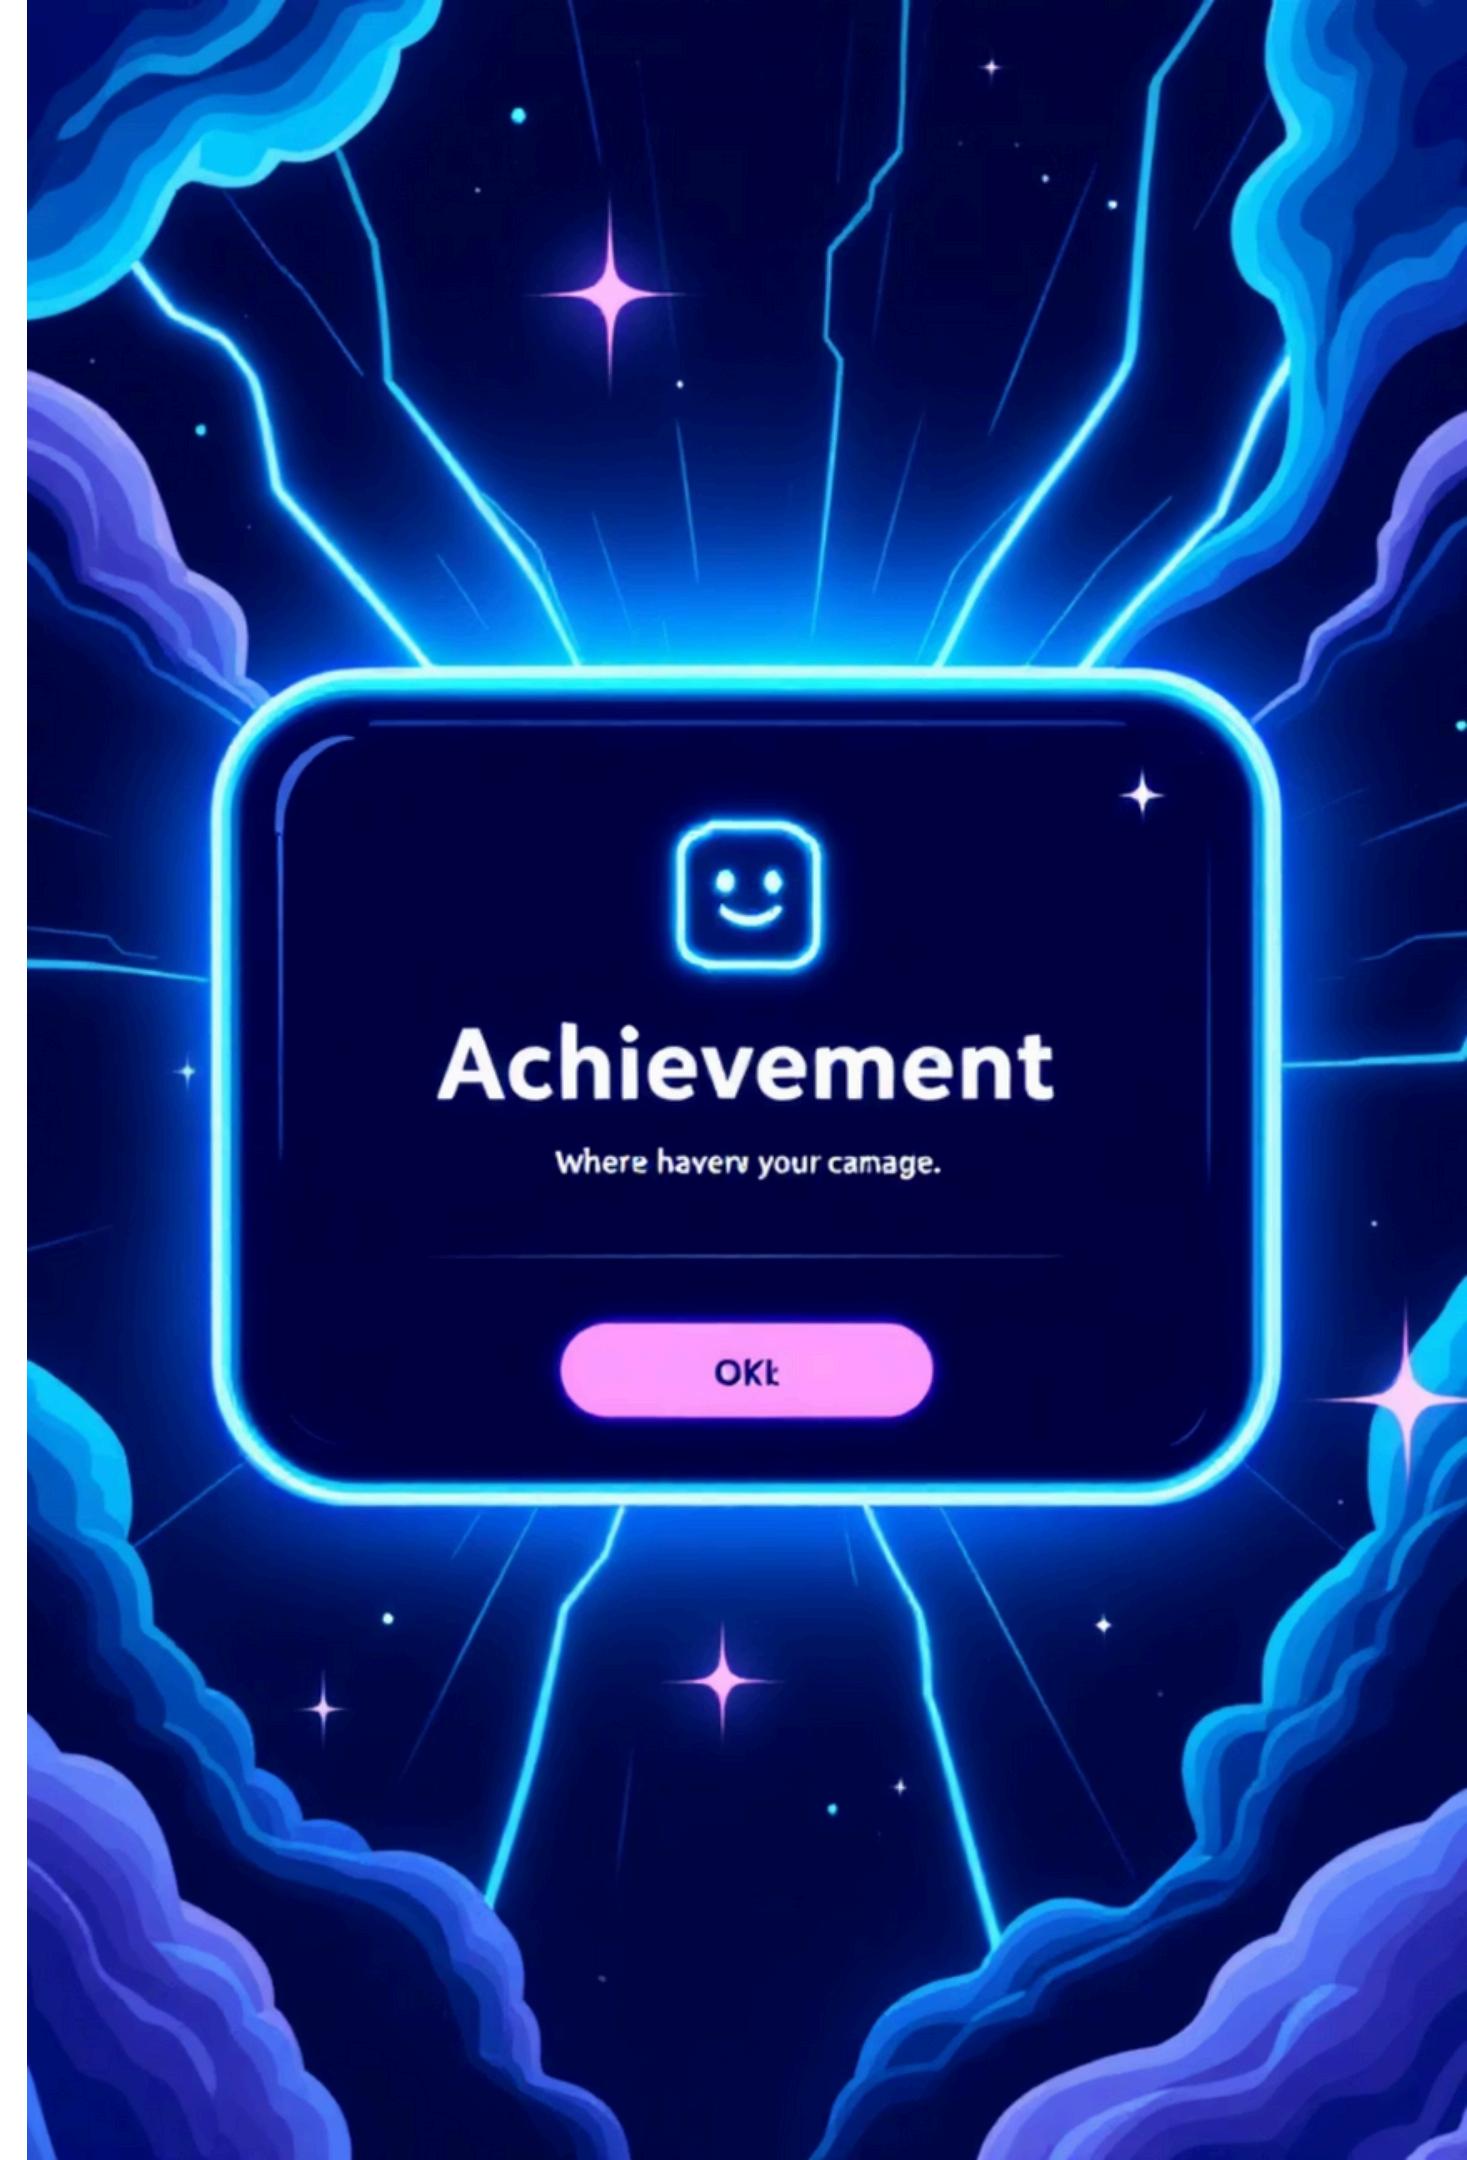

Two-Line Format

Keep it short and punchy - just like real game notifications that pop up and make you smile.

Building Your Comedy Workflow

Add New Switch Paths

Create conditions for specific professions you want to target with silly content.

Connect AI Agent Nodes

Link each path to a new AI Agent with your custom hilarious prompts.

Route to Output

Send results to Form Output, Airtable, or Slack for maximum comedy impact.

Pro Tips for Maximum Laughs

- Keep personas [wildly inappropriate](#) for the task
- Use **unexpected combinations** - serious jobs with silly powers
- Make achievements *completely useless* but oddly specific
- Test with friends first - [they're your best debugging tool](#)
